# Customer Supply Pipe Repair Companies

We regret, that due to the competition act South West Water is unable to recommend a contractor, however, for your information the names and telephone numbers of contractors that we know specialise in this field of work, and who may be able to help you detect and repair your leaking service pipe, are detailed below.

Alternatively, telephone numbers can be found in the yellow pages under the sections water engineers, plumbers or builders/ construction companies. We would suggest that you obtain quotes from more than one reputable contractor as prices and response times may vary.

Some of the contractors have freephone numbers and some offer discounts for the elderly or a free quote or call out. In the case of hardship you may wish to contact a local support agency for assistance (i.e. The Care and Repair Service for the elderly and disabled).

You may also wish to check whether your household insurance policy or specific plumbing insurance provides cover for any pipework repair or replacement that you may require. Where insurance cover is available, it may be possible to combine this with a financial contribution from South West Water.

The majority of the contractors on the list undertake leak repairs and renewal of external underground supply pipes and those denoted with an "**I**" or "**H**" also offers an internal plumbing service and/or may undertake work in the public highway.

**These contractors have confirmed to us that they are happy to travel to your property to provide a quote or undertake work for you.**
