

SL-N2A Request for South West Water to make a mains connection

This form should be used when South West Water is to connect up self-laid mains to the existing network. It should be submitted five working days in advance of the date on which the self-laid mains are to be swabbed, chlorinated and pressure tested, to DeveloperServicesSelfLay@southwestwater.co.uk

1. Scheme Details

Work request number

Site name

Developer

Self Lay Provider

2. Swabbing, Pressure, Testing Chlorination and Connection Dates

When did you swab the mains?

When did you pressure test the mains?

When did you chlorinate the mains?

When was the sampling of the main?

Was the sample carried out by South West Water?

3. Details of the mains to be commissioned

How many end washouts or end hydrant/washouts are there on the mains that are to be commissioned?

You must attach a plan, showing the mains on this site to this form. Please clearly highlight the mains that are to be commissioned.

Tick to indicate that such a plan is attached.

Please indicate the diameters and approximate length of the mains that are to be commissioned.

Diameter (mm)	Length (m)	Material
