

## Duration & learning approach

Two day unit assessed by:

- Direct observation
- A written test

## What you will learn

By the end of the course delegates will be able to:

- Prepare to work safely in medium risk confined spaces under emergency conditions
- Oversee entry and exit into confined spaces in non-entrant capacity
- Prepare and use equipment and tools safely and in accordance with manufacturers' specifications
- Follow procedures and work safely
- Deal with emergencies
- Use appropriate behaviour for working in medium risk confined spaces
- Use appropriate water industry knowledge for working in medium risk confined spaces
- Apply relevant water industry standards for working in medium risk confined spaces

## Overview

The aim of this unit is to assess learners against the national standard in a realistic medium risk confined space environment. It involves overseeing entering and exiting confined spaces safely and using equipment and tools safely. The unit also assesses learners monitoring procedures and dealing with emergencies.

There is also a behavioural emphasis on the delegate undertaking the assessment in an efficient and safe manner. The unit also requires the learner to demonstrate sufficient general and water-specific knowledge through a mix of practical observation and written assessment.

## Who this course is for

Any person wishing to act as a top man for, but not enter, medium risk confined spaces.

## Course requirements

It is recommended that all persons who attend this course are medically fit to work in confined spaces.
