

Duration & learning approach

Three day unit assessed by:

- Direct observation
- A written test

What you will learn

By the end of the course delegates will be able to:

- Prepare to act as a safety attendant for teams working in confined spaces
- Oversee safe entry and exit into confined spaces
- Monitor work team to ensure procedures are followed
- Deal with emergencies
- Use appropriate behaviour for working in high risk confined spaces
- Use appropriate water industry knowledge for working in high risk confined spaces
- Apply relevant water industry standards for working in high risk confined spaces

Overview

The aim of this unit is to assess learners in acting as top person in a high risk confined space environment. It involves overseeing a work team preparing to work safely, entering and exiting confined spaces safely. The unit also assesses learners monitoring procedures and dealing with emergencies.

There is also a behavioural emphasis on the delegate undertaking the assessment in an efficient and safe manner. The unit also requires the learner to demonstrate sufficient general and water-specific knowledge through a mix of practical observation and written assessment.

Who this course is for

Any person wishing to act as a top person for high risk confined space operations.

Course requirements

It is recommended that all persons who attend this course are medically fit to work in confined spaces.
